

ROYNON MUSEUM OF EARTH SCIENCE & PALEONTOLOGY

Girl Scout Patch Programs

Geology is the study of the earth's history, physical structure, and substance.; while paleontology is the study of fossil animal and plants. Allow us to help you discover the earth's past life, explore and gain knowledge of how geologists and paleontologists use these studies to gain scientific approaches to the future and how it affects life on earth now, and find out how you can take action in the communities around them.

Girl Scouts will have the chance to learn, hands-on, about earth science and paleontology while earning a special patch designed exclusively for our museum.

Daisies & Brownies (Earth & Sky and Eco-Explorer)

Do you like rocks, minerals, and fossils? How about wanting to go on a dig?
Do you enjoy being outdoors and exploring nature?

Juniors (Rocks Rock)

How often do you think about rocks or fossils? Do you enjoy collecting?
Have you ever thought about the different careers related to these?

Cadettes, Seniors, & Ambassadors (Museum Discovery, Digging Through the Past, Collecting)

Do you enjoy visiting museums? Have you thought about a career in geology or paleontology?
Have you ever started a collection and wondered how do I tell if it is real or a fake?

\$20 per Girl Scout includes:

- Private 2.5-3 hours class/tour
- Specimen Box
- Bag of Polished Rocks
- Small Geode
- Patch

We also have a Gift Shop for souvenirs!

Please visit our website to see a video of one of our classes and "Like" us on Facebook to receive updates.

RoynonMuseum.org <https://www.facebook.com/roynonmuseum/>

We endeavor to educate and inspire our youth and community members about the wonders and excitement of earth science and paleontology.

"To intrigue, educate, and inspire"
